|-----------------------------------|---|
| <b>Basic search</b>               | The search tool finds pages that contain <b>all</b> the words you are searching for. The words can be anywhere on the page.<br><br>FindinSite-CD ignores all punctuation characters in your search text.  |
| <b>Word stemming and synonyms</b> | Searching for <b>throw</b> will also match the words <b>throws, thrower, throwers, ...</b><br>Common mis-spellings and regional variations are also matched, so <b>teh</b> will also find <b>the</b> , and <b>color</b> will also find <b>colour</b> and vice versa.<br><br>Put text in 'single quotes' if you do not want word stemming or synonyms.   |
| <b>Letter case</b>                | Use single quotes to match capitals eg: ' <b>Mexico</b> '.  |
| <b>Adjacent words</b>             | Use double quotes to match adjacent words eg: " <b>mexico city</b> ".<br>Punctuation characters have the same effect, so <b>sales@phdcc.com</b> is equivalent to " <b>sales phdcc com</b> ".<br><br>These searches may take longer.   |
| <b>Logical searches</b>           | Use <b>and, or, not</b> and parentheses ( ) to do logical searches.<br>To find the words <b>and, or</b> or <b>not</b> put them in "double quotes".<br><br>A basic search for <b>swiss cheese</b> is equivalent to <b>swiss and cheese</b> .   |
| <b>Wild cards</b>                 | Use <b>?</b> to match exactly one character and <b>*</b> to match any number of characters. For example, <b>mexic?</b> and <b>mex*</b> both match the word <i>mexico</i> .<br><br>Based upon the character recognition process used in creating the search database, partial words followed by <b>*</b> obtain the best results, e.g., <b>disgor*</b> . |
